We must carefully bear in mind that the object to be accomplished is a matter of "Evolution," and not "Revolution." By the very laws governing the former, it is of necessity of slow growth. It has taken fifty years, or more of conhas taken fifty years, or more of constant effort by some of the brightest minds of the age. Of course that is a thing of the past, I only revert to it to show that any innovation will at the out-set be op-posed by the great majority of people. All "isms" (that in time arise, which result in the betterment of the human race,) are often all but the simple, natural adjustment of the eternal law of "right," which is inevitable in the oggress of civilization, always im-iled by that universal "motor" Evolution—and sometimes for a period, by an abnormal and unhealthy od, by an abnormal and unhealthy development of Evolution—called "Revolution." The march of truth into what ever field it may entrench itself, will always be impeded by all the means that error can command. Truth would have no polish and parity except it ground constantly against opposition. The diamond is simply laser matter until polished. Then it takes on "life;" so with truth. For truth to patiently give facts and For truth to patiently give facts and figures—"whys" and wherefores" of all the "isms" that enter into the current of humanity, is but a necessary Opposition to all theories seems to be requisite to make facts absolute, all thoughts worth living are born of tribulation. Suffragists from Maine, Vermont, and Rhode Island, came in, and all with one accord joined in the chorus of rejoicing for Kansas, and with it.
